

**Name: -Shubham B.  
Pasale**

Program name :- IOStream

IOStream.java file Code :-

```
import java.io.*;
```

```
import java.util.*;
```

```
import java.io.IOException;
```

```
public class IOStream {
```

```
    public static void main(String[] args) throws IOException {
```

```
        String str = "Shubham Baliram Pasale";
```

```
        try {
```

```
            File file = new File("E:/Symbi/IOStreamtxt file/lostream.txt");
```

```
            FileWriter fw = new FileWriter(file,true);
```

```
            for(int i=0;i<str.length();i++)
```

```
                fw.write(str.charAt(i));
```

```
//                fw.append( "\n \r Mobile no : " );
```

```
            System.out.println("Succesfully Written");
```

```
            fw.close();
```

```
        }
```

```
        catch(Exception e) {
```

```
            e.printStackTrace();
```

```
        }
```

```
    } }
```

```
//next code in filereader.java file continued
```

Filereader.java file code :-

```
import java.io.*;

public class Filereader {

    public static void main(String[] args) throws Exception {
        FileReader fl = new FileReader("E:/Symbi/loStreamtxt file/lostream.txt");
        int i;
        while((i=fl.read())!=-1)
            System.out.print((char)i);
        fl.close();
    }
}
```

Output:-

Succesfully Written
