

Name:-Snehalata S. Shendage

File Handling:-

```
import java.io.File;
import java.io.FileInputStream;

public class ReadFile {
    public static void main(String args[]) {
        final String fileName = "file1.txt";

        try {
            File objFile = new File(fileName);
            if (objFile.exists() == false) {
                System.out.println("File does not exist!!!");
                System.exit(0);
            }

            //reading content from file
            String text;
            int val;

            //object of FileInputStream
            FileInputStream fileIn = new FileInputStream(objFile);
            //read text from file
            System.out.println("Content of the file is: ");
            while ((val = fileIn.read()) != -1) {
                System.out.print((char) val);
            }

            System.out.println();

            fileIn.close();
        } catch (Exception Ex) {
            System.out.println("Exception : " + Ex.toString());
        }
    }
}
```

Output:-

Content of the file is:
Java is a platform independent language.
